

**PATENT**

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

In re Application of: Spencer A. Rathus, et al.

Serial No.: TO BE ASSIGNED

Group Art Unit: TBA

Filed: January 25, 2001

Examiner: TBA

For: METHOD AND APPARATUS FOR  
ACCESSING ELECTRONIC DATA  
VIA A FAMILIAR PRINTED MEDIUM

Atty. Doc. No.: 660-027

Honorable Commissioner of Patents and Trademarks  
Washington, D.C. 20231

**SUPPLEMENTAL PRELIMINARY AMENDMENT**

Prior to substantive review of the subject application,  
please amend as follows:

**IN THE CLAIMS**

Please cancel claims 1-167. Please add the following new  
claims:

168. A system for displaying programming to a user, the system  
comprising:

printed stationery having at least one machine

recognizable feature;

a feature recognition unit having associated therewith

a means for recognizing said feature and a means

for transmitting a coded signal in response to the

recognition of said feature;

**PATENT**  
**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

an intelligent controller having associated therewith a  
means for accessing said programming material in  
response to receiving said coded signal; and  
a display unit for presenting said programming  
material.

169. A system as defined in claim 168 wherein said at least one  
machine recognizable feature has associated therewith a data  
link which is recognized by said recognition unit.

170. A system as defined in claim 169 wherein said data link  
comprises an image data link.

171. A system as defined in claim 169 wherein said data link  
comprises a video data link.

172. A system as defined in claim 169 wherein said data link  
comprises a programming data link.

173. A system as defined in claim 169 wherein said data link  
comprises a sound data link.

**PATENT**

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

174. A system as defined in claim 169 wherein said data link comprises an online data link.
175. A system as defined in claim 169 wherein said data link comprises a online shopping data link.
176. A system as defined in claim 169 wherein said data link comprises a pictorial data link.
177. A system as defined in claim 169 wherein said data link comprises an electronic data link.
178. A system as defined in claim 169 wherein said data link comprises an electronic media link.
179. A system as defined in claim 169 wherein said data link comprises an "information superhighway" data link.
180. A system as defined in claim 179 wherein said "information superhighway" data link comprises the internet.

**PATENT**  
**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

181. A system as defined in claim 179 wherein said "information superhighway" data link comprises the world wide web.

182. A system as defined in claim 179 wherein said "information superhighway" data link comprises a computer network.

183. A system as defined in claim 179 wherein said "information superhighway" data link comprises an ISDN network.

184. A system as defined in claim 179 wherein said "information superhighway" data link comprises a telephone line.

185. A system as defined in claim 179 wherein said "information superhighway" data link comprises a CATV line.

186. A system as defined in claim 179 wherein said "information superhighway" data link comprises a local area network.

187. A system as defined in claim 179 wherein said "information superhighway" data link comprises a wide area network.

**PATENT**

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

188. A system as defined in claim 179 wherein said "information superhighway" data link comprises a data communications network.

189. A system as defined in claim 179 wherein said "information superhighway" data link comprises an Internet Product Service Directory.

190. A system as defined in claim 179 wherein said "information superhighway" data link comprises a globally based digital communications network.

191. A system as defined in claim 179 wherein said "information superhighway" data link comprises a wireless network link.

192. A system as defined in claim 179 wherein said "information superhighway" data link comprises a Wireless Application Protocol internet.

193. A system as defined in claim 179 wherein said "information superhighway" data link comprises an ethernet network.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

194. A system as defined in claim 179 wherein said "information superhighway" data link comprises a RF cellular network.

195. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a bar code.

196. A system as defined in claim 195 wherein said bar code comprises a Universal Product Code.

197. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible bar code.

198. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a magnetic code.

199. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a printed character.

200. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a symbol.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

201. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a pictorial icon.

202. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible indicia.

203. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a two-dimensional figure.

204. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an icon.

205. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible icon.

206. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a watermark.

207. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

watermark.

208. A system as defined in claim 207 wherein said invisible watermark comprises a digital watermark.

209. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a series of alphanumeric characters.

210. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a binary code.

211. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a digital watermark.

212. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a magnetic strip.

213. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a code.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

214. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an on line shopping product code.

215. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a home shopping product code.

216. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an online shopping service code.

217. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a home shopping service code.

218. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an analog pattern.

219. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a hieroglyphic

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

character.

220. A system as defined in claim 168 wherein said programming material comprises information.

221. A system as defined in claim 168 wherein said programming material comprises a service.

222. A system as defined in claim 221 wherein said service comprises accessing a Web page related to an organization printed on said stationery.

223. A system as defined in claim 221 wherein said service comprises accessing a Web page related to an individual sending said stationery.

224. A system as defined in claim 221 wherein said service includes displaying promotional programming on said display unit of said user.

225. A system as defined in claim 221 wherein said service

**PATENT**

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

includes conducting an interaction with said user via a telephone.

226. A system as defined in claim 221 wherein said service includes conducting an interaction between a plurality of users via an online communication chat link.

227. A system as defined in claim 168 wherein said display unit comprises a personal computer.

228. A system as defined in claim 227 wherein said personal computer comprises a laptop computer.

229. A system as defined in claim 168 wherein said display unit comprises a television.

230. A system as defined in claim 168 wherein said display unit comprises a device containing a microprocessor.

231. A system as defined in claim 230 wherein said device containing a microprocessor is hand-held.

**PATENT**

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

232. A system as defined in claim 230 wherein said device containing a microprocessor is portable.
233. A system as defined in claim 168 wherein said display unit comprises a personal digital planner.
234. A system as defined in claim 168 wherein said display unit comprises an internet appliance.
235. A system as defined in claim 168 wherein said display unit comprises a cellular telephone.
236. A system as defined in claim 168 wherein said display unit comprises a wireless communication device.
237. A system as defined in claim 168 wherein said display unit comprises a simulated book.
238. A system as defined in claim 168 wherein said display unit comprises an intelligent terminal.

**PATENT**

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

239. A system as defined in claim 168 wherein said display unit comprises a web-based television.

240. A system as defined in claim 168 wherein said display unit comprises a pager.

241. A system as defined in claim 168 wherein said display unit comprises an Internet-enabled telephone.

242. A system as defined in claim 168 wherein said recognition unit is selected from a group consisting of a hand-held unit, a scanner, a bar code scanner, an optical code reader, an optical reader, a personal camera, a personal computer reader, a digital camera, a digital mouse and an optical mouse.

243. A system as defined in claim 242 wherein said recognition unit is linked to a personal computer.

244. A system as defined in claim 242 wherein said recognition unit is linked to a wireless interface.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

245. A system as defined in claim 244 wherein said wireless interface comprises a wireless network.

246. A system as defined in claim 245 wherein said wireless network comprises a cellular network.

247. A system as defined in claim 244 wherein said wireless interface comprises a cellular telephone.

248. A system as defined in claim 244 wherein said wireless interface comprises a pager.

249. A system as defined in claim 244 wherein said wireless interface comprises a wireless personal computer.

250. A system as defined in claim 244 wherein said wireless interface comprises a personal digital assistant.

251. A system as defined in claim 242 wherein said recognition unit is linked to a personal digital assistant.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

252. A system as defined in claim 242 wherein said recognition unit is linked to an Internet appliance.

253. A system as defined in claim 242 wherein said recognition unit is linked to a television set.

254. A system as defined in claim 242 wherein said recognition unit comprises a portion of a cellular telephone.

255. A system as defined in claim 242 wherein said recognition unit comprises a portion of a personal digital assistant.

256. A system as defined in claim 242 wherein said recognition unit comprises a portion of a remote control unit.

257. A system as defined in claim 242 wherein said recognition unit comprises a portion of a handwriting implement.

258. A method of providing a user access to programming material, comprising the steps of:

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

imprinting a machine recognizable feature within a  
printed stationary;  
scanning said machine recognizable feature of said  
printed stationary; and  
transmitting data associated with said machine  
recognizable feature via a communication link to  
access said programming material, wherein said  
programming material is related to said printed  
stationary.

259. The method of claim 258 wherein said communication link  
includes the Internet.

260. The method of claim 258 wherein said machine recognizable  
feature is selected from a group consisting of bar code,  
universal product code, invisible bar code, magnetic code,  
printed character, symbol, icon, invisible indicia, two-  
dimensional figure, icon, invisible icon, watermark,  
invisible watermark, digital watermark, series of  
alphanumeric characters, binary code, digital watermark,  
magnetic strip, code, analog pattern, and hieroglyphic

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

character.

261. A method of providing a user access to supplemental programming material associated with a printed stationary, comprising the steps of:

imprinting a machine recognizable feature within said

printed stationary wherein said machine

recognizable feature has associated therewith a

command sequence for accessing programming

material;

scanning said machine recognizable feature within said

printed stationary and downloading data indicative

of said machine recognizable feature via the

Internet to a remote server;

accessing programming material from said remote server;

and

transmitting said programming material to said user

allowing said user to perceive said programming

material in a humanly perceivable form, wherein

said programming material is related to said

printed stationary.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

262. The method of claim 261 wherein said programming material comprises multimedia.

263. The method of claim 261 wherein said machine recognizable feature is selected from a group consisting of a bar code, a universal product code, invisible bar code, magnetic code, printed character, symbol, icon, invisible indicia, two-dimensional figure, icon, invisible icon, watermark, invisible watermark, digital watermark, series of alphanumeric characters, binary code, digital watermark, magnetic strip, code, analog pattern, and hieroglyphic character.
